

ENGINEERING OPPORTUNITIES

ICD Asia Pacific Pty Ltd, a subsidiary of global services provider Transfield Services Ltd, is a leading consultancy providing multidisciplinary engineering design, project and construction management services to the Refining, Oil & Gas, Mining and other heavy Process Manufacturing industries.

To meet our current and future business needs and the subsequent expansion of ICD's business activities, we are now seeking enthusiastic, self-motivated professionals with the technical and communication skills to fill the following positions for our offices in the Sydney area:

- **Design and Project Engineers (E&I, Mechanical & Civil/Structural):**
 - **Requires an engineering degree or equivalent qualification preferably with experience in Oil & Gas or Industrial Process Manufacturing.**
- **Designers and Drafters (Piping, Mechanical, E&I, Civil/Structural):**
 - **Requires design experience in the Industrial Process Manufacturing Industries.**
- **Document Controller:**
 - **Requires experience in maintaining technical documents in an Industrial Process Manufacturing environment.**

These positions offer competitive remuneration, flexible conditions and professional development opportunities.

Enquiries and applications should be directed by e-mail to:
